

Cheetah Systems

Material Handling and Labeling Solutions

Innovative Designs at Unbelievable Prices

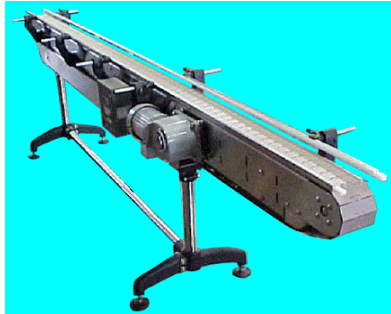

Table Top Chain® Conveyors

Cheetah Systems Table Top Chain Conveyors are built directly to the customers specifications. Straight, curved, inclines, or declines are all manufactured here at our facility in St. Petersburg, Florida.

Cheetah Systems specializes in fabricating stainless steel conveyors for food processing and bottling applications. Conveyor frames are constructed of 304 stainless steel and are available in many different finishes. All types of guide rail configurations are also available.

Standard Features

3-Phase Stainless Steel Motor w/Epoxy Coated Gear Box

3" round plastic levelers w/ +/- 2" height adjustment & floor mounting holes

UHMW lined stainless steel guide rails

#40 stainless steel drive chain & sprockets with safety guard

Cheetah Systems engineers are available to assist you with all of your company's material handling, packaging, or Labeling requirements
